

Eco Bi-Polymer

HI-VIS GLOVE

PERFORMANCE STANDARDS

EN388

4141X

CERTIFICATION

NB2056
CEC40300

FEATURES

- ▶ Bi-Polymer coating provides enhanced flexibility with a superior wet, oily and dry grip
- ▶ Touch screen friendly
- ▶ Resists oil and solvent degradation
- ▶ 360 degree hi-visibility yellow provides additional visual wearer safety
- ▶ Perfect form, fit and comfort is achieved through Force360's unique knit pattern that mimics a 'hand at rest', minimizing hand fatigue
- ▶ UPF50+ offering maximum sun protection
- ▶ Suited to general purpose applications where maximum dexterity is required

INDUSTRIES

- ▶ General Assembly
- ▶ DIY
- ▶ Construction and mining
- ▶ Maintenance
- ▶ Logistics and warehousing
- ▶ Finishing

SPECIFICATIONS

PART NO.	GWORX111
COATING	Bi-Polymer
LINER	Nylon

SIZING & FIT

AVAILABLE SIZES

S/7, M/8, L/9, XL/10, 2XL/11

DEXTERITY LEVEL

Maximum Dexterity Level 5

Certified under AS/NZS 2161.2

PACKAGING

12 pairs per inner pack

144 pairs per carton

REACH COMPLIANCE

Required Safe pH Level

Certified under AS/NZS 2161.2

AZO Dye and Irritant Chemical Free

Certified under AS/NZS 2161.2

SUN PROTECTION

UPF50+ Sun Protection

Pass under AS/NZS 4399 Sun Protective Clothing.

Tested by Australian Radiation Protection And Nuclear Safety Agency (ARPANSA)

GLOVE CARE

Machine Wash <40°C

Cold Water Rinse

Dryer <60°C

KEY TECHNOLOGIES EXPLAINED

BI-POLYMER COATING

Force360's Bi-Polymer coating is a combination of two polymer materials chemically bonded to give the user both mechanical toughness and exceptional grip and flexibility.

TOUCH SCREEN FRIENDLY

Force360's touch screen friendly technology allows the wearer to use their mobile devices without removing their hand protection.

HAND AT REST

Perfect form, fit and comfort is achieved through Force360's unique knit pattern that mimics a 'hand at rest', minimizing hand fatigue.

WHY CERTIFY A GLOVES MECHANICAL SCORES?

Unknown to most people, gloves in Australia are almost always sold as compliant to European Standards. They will show a European Standards mark and mechanical score for example -'EN388 4542X'. They may state in their literature 'Compliant to European Standards' or 'meets European Standards'.

This is NOT the same as being certified To European Standards.

Compliant gloves can be simply marked with a particular cut level score of 5 or F for example; and the wearer must accept this claim. No further proof or validation from the glove manufacturer is required. For Force360 this is not acceptable. Hand injuries are commonplace and simply making compliance claims is just not enough to guarantee a glove's mechanical score, or it's protection level.

Asking a trusted and independent notifying body to certify the mechanical scores, guarantees that the scores are accurate and performance will meet this certification.

Force360 has entrusted **SAI Global**, the worlds' leading Standards Certifier to ensure that all mechanical scores are validated. This certification process ensures manufacturing processes and facilities, test certificates, and the product itself are audited & scrutinized so that all claims are accurate. The notifying body in affect becomes a gatekeeper of hand protection for the wearer.

Force360's entire hand protection range is certified by SAI Global to the latest European and Australian Standards.

Certified products must show a license number issued by the notifying body in addition to the EN388 mechanical scores.
