

## Original Fast Fit

HI-VIS MECHANICS

### PERFORMANCE STANDARDS

### CERTIFICATION

### FEATURES

- ▶ 4 Way Spandex is used in this glove construction allowing complete hand movement and flexibility
- ▶ Synthetic palm that provides a more durable alternative to leather
- ▶ Hi-visibility liner for increased safety awareness
- ▶ Fast fit cuff for convenience
- ▶ Only selected materials that allow air flow are used to ensure 360 degree air circulation and enhanced breathability
- ▶ UPF50+ offering maximum sun protection

### INDUSTRIES

- ▶ Automotive
- ▶ Construction
- ▶ DIY
- ▶ Gardening
- ▶ Logistics & warehousing
- ▶ Maintenance
- ▶ Mining
- ▶ Shipping

### SPECIFICATIONS

PART NO. GWORX5  
LINER 4 Way Spandex

### SIZING & FIT

AVAILABLE SIZES  
S/7, M/8, L/9, XL/10, 2XL/11

### DEXTERITY LEVEL

Maximum Dexterity Level 5  
Certified under AS/NZS 2161.2

### PACKAGING

1 pair per hang cell  
12 pairs per inner pack  
72 pairs per carton

### REACH COMPLIANCE

Required Safe pH Level  
Certified under AS/NZS 2161.2

AZO Dye and Irritant Chemical Free  
Certified under AS/NZS 2161.2

### SUN PROTECTION

UPF50+ Sun Protection  
Pass under AS/NZS 4399 Sun Protective Clothing.  
Tested by Australian Radiation Protection And Nuclear Safety Agency (ARPANSA).

### GLOVE CARE

Machine Wash <40°C  
Cold Water Rinse  
Dryer <60°C

**KEY TECHNOLOGIES**

**4 WAY SPANDEX**

Force360 only uses 4 Way Spandex in its glove construction allowing complete hand movement and flexibility.

**REINFORCED WEAR POINTS**

Force360 gloves last longer due to a double layer fabric coupled with double stitching reinforcement in high wear areas.

**360 BREATHABILITY**

Keeping hands cool is critical for comfort and improved wearer compliance. Only selected materials that allow air flow are used to ensure 360 degree air circulation and enhanced breathability.

**WHY CERTIFY A GLOVES MECHANICAL SCORES?**

Unknown to most people, gloves in Australia are almost always sold as compliant to European Standards. They will show a European Standards mark and mechanical score for example -'EN388 4542X'. They may state in their literature 'Compliant to European Standards' or 'meets European Standards'.

**This is NOT the same as being certified to European Standards.**

Compliant gloves can be simply marked with a particular cut level score of 5 or F for example; and the wearer must accept this claim. No further proof or validation from the glove manufacturer is required. For Force360 this is not acceptable. Hand injuries are commonplace and simply making compliance claims is just not enough to guarantee a glove's mechanical score, or it's protection level.

Asking a trusted and independent notifying body to certify the mechanical scores, guarantees that the scores are accurate and performance will meet this certification.

**Force360** has entrusted **SAI Global**, the worlds' leading Standards Certifier to ensure that all mechanical scores are validated. This certification process ensures manufacturing processes and facilities, test certificates, and the product itself are audited & scrutinized so that all claims are accurate. The notifying body in affect becomes a gatekeeper of hand protection for the wearer.

**Force360's entire hand protection range is certified by SAI Global to the latest European and Australian Standards.**

Certified products must show a license number issued by the notifying body in addition to the EN388 mechanical scores.
