

HARD HAT - ACCESSORIES

FPR HEAD PROTECTION

INTERNAL MARKINGS

- ▶ Safety hard hats have a “use by date” or a “working life”. Section 3 of Australian Standard AS/NZS 1800:1998 details the “Care and Maintenance of Occupational Protective Helmets”, and Section 3.4 covers the “Working Life”.
- ▶ A **3 year replacement date** has been adopted as an Australian Standard.
- ▶ Each hard hat, when manufactured, has a year and month of manufacture stamped onto the inside of the shell near the peak for easy reading.
- ▶ Each hard hat also has a sticker placed inside it that allows the wearer to record a date of issue.
- ▶ Hard hats must be replaced 3 years after being issued and first worn. This is not then necessarily 3 years after manufacture.
- ▶ It is suggested though that hard hats be replaced 3 years after manufacture if they have not been issued and worn. This is especially important if they have been stored in direct sunlight.
- ▶ Hard hats should be inspected weekly and replaced if they are cracked, worn, discoloured or have had an impact.
- ▶ The internal hard hat harness should be replaced every 2 years

ACCESSORIES

FORCE360 CODE	DESCRIPTION	COLOUR	MOQ
HPFPRRWH	Force360 6 Point Premium Comfort Harness (Terelyne)	Black	10

HPFPVRT3	Force360 Reflective Tape Kit for Helmet 2 curves	Silver	10

STANDARDS & CERTIFICATION

Force360 source their entire range of hard hats from a single manufacturing partner to ensure consistency and reliability of product. Most importantly Force360 have taken the further step by engaging SAI Global to periodically audit and certify both the manufacturing process and the products. All of Force360's hard hats are certified to AS/NZS 1801. This standard in part ensures shock absorption, resistance to penetration, stiffness of the shell and electrical resistance are all within specified parameters. For **Certified Australian Standard** protection, only wear head protection with the Red Tick Tower.
